**Dunham Associates, Inc. Names New President and CEO**

*Top leadership position will transition to current Executive Vice President Matt Jensen*

MINNEAPOLIS – Under Jay Rohkohl's leadership as President and CEO, Dunham Associates, Inc. has experienced remarkable growth and success. Our staff size doubled, we established new market sectors, and expanded our footprint to include Dallas, Texas and Sioux Falls, South Dakota. Rohkohl joined Dunham in 1997 as Director of Electrical Engineering. He took over as President and CEO of the firm in 2011. Jay returns to his previous position as Executive Vice President, creating a path for his successor, Matt Jensen, who takes over as President and CEO.

*“After 64 years, Dunham is poised to take on the future with the 4th generation of leadership. Beginning as a start-up in Rapid City, SD the firm has transformed into one of the largest and well-respected MEP firms. Matt has been an integral part of that evolution for the past 15+ years. I want to wish Matt the best as he leads the firm into the future.”*

*- Jay Rohkohl.*

Jensen joined Dunham in 2006 as a mechanical engineer. Prior to joining Dunham, he spent 11 years with other Minnesota engineering firms. He is a registered Professional Engineer in 29 states, eight Canadian provinces, is a LEED-Accredited Professional BD+C, and holds a Bachelor of Mechanical Engineering from the University of Wisconsin-Madison.

*"During Jay's tenure as President, Dunham has made great strides in becoming an innovative leader in our industry. I am honored to be a part of such a great firm and look forward to building upon a strong foundation. With our great clients and wonderful staff, I am excited for the bright future we have ahead of us."*

*- Matt Jensen*

The Board of Directors and Managing Partner group will remain the same with Matt, Jay, and Steve Gentilini occupying these positions.

*"This is a unique and strategic process of leadership transition, having overlap at the Executive Level rather than transition occurring simultaneously with resignation or retirement, As I move into my last year before retirement, I look forward to helping Matt in his new leadership role to maintain Dunham's status as a preeminent consulting engineering firm."*

*- Steve Gentilini, Executive Vice President*
